Graduate brochure

WE
ARE

Edson College of Nursing and Health Innovation,

creating health care leaders and preparing nurses at every level to produce the best health outcomes possible, using evidence-based practice. Our cutting-edge research centers and top-notch faculty advance the

areas of cognitive development, dementia, family caregiving and public health. Diverse health and innovation degrees address complex challenges that take students beyond the hospital and out into the community. Health care is ripe for disruption, and no matter which degree they choose, every Edson College graduate is ready to rethink health care.

Nationally Recognized

#1
in the
U.S. for
innovation
*U.S. News & World
Report*

Degree Programs

Aging

Addresses the multidimensional aging process, the needs of aging populations and encourages community collaborations that are both beneficial and sustainable to improve health outcomes.

Programs available:

- MS Aging
- Interprofessional Healthy Aging graduate certificate

Clinical Research Management

Prepares graduates to lead complex global clinical research operations – including fiscal, ethical and regulatory practices – for employers throughout the rapidly growing clinical research industry.

Programs available:

- MS Clinical Research Management
- MS Clinical Research Management (Regulatory Science)
- Clinical Research Management graduate certificate

Health Care Simulation

Offers interprofessional students state-of-the-art training in health care simulation focused on educational, operational and assessment expertise needed to improve simulation settings.

Programs available:

- MS Health Care Simulation

Health Care Innovation

Prepares students to lead transformation in health care. Graduates will create, lead and sustain cultures of innovation from multiple perspectives.

Programs available:

- MHI Healthcare Innovation
- Health Care Innovation graduate certificate

Regulatory Science

Focuses on safety as a fundamental aspect of regulatory science, the application of regulations and compliance throughout the life cycle of medical or food products.

Programs available:

- MS Regulatory Science
- MS Regulatory Science (Food Safety)
- Food Safety and Protection graduate certificate

MS Nursing

Prepares nurses with the skills and education needed to advance their careers.

Programs available:

- MS Nursing
- RN to MS Nursing Bridge
- MS Nursing (Nursing Education)
- Nurse Education in Academic and Practice Setting graduate certificate

Advanced Nursing Practice

Prepares graduates to improve health outcomes for individuals and organizations.

Specialty Areas:

- Acute Care Pediatric
- Adult-Gerontology
- Advanced Nursing Practice
- Emergency
- Family
- Family Psychiatric Mental Health
- Innovation Leadership
- Pediatric
- Women's Health

Nursing and Healthcare Innovation

Designed for scholars who wish to pursue careers as leaders in health policy, education and research, this degree helps address a national need for faculty and researchers who are increasingly in short supply.

Programs available:

- PhD Nursing and Healthcare Innovation

Prelicensure Nursing

Prepares future Registered Nurses with the skills and education to impact health care. Graduates are eligible to sit for the NCLEX-RN.

Programs available:

- MS Nursing (Entry to Nursing Practice)
- Accelerated BSN
