# Nursing and Health Innovation

# Student-Driven Success

## PhD Nursing and Healthcare Innovation

*Our interdisciplinary PhD program provides both BS-PhD and MS-PhD students a research environment that fosters scholarship, critical thinking and creativity. Coursework is offered through a hybrid format designed to maintain the commitment to a highly mentored, interactive learning experience. Our PhD graduates conduct collaborative interdisciplinary research on the most critical challenges of our time. They are the next generation of leaders and scholars in the field, promoting discovery, generating knowledge with purpose and applying it to health outcomes.*

- Bronwynne Evans, PhD, RN, FNGNA, ANEF, FAAN, Director of PhD program

## DNP Doctor of Nursing Practice

*The DNP program prepares advanced practice nurses and nurse leaders to effectively impact the health of individuals, populations and systems. Through application of evidence, the DNP prepared nurse creates innovative solutions to lead change in complex systems, impact health policy, and improve local, national and international health. Each DNP student works with an individual mentor to design, implement and evaluate an evidence-based project that focuses on improved health outcomes.*

- Katherine Kenny, DNP, RN, ANP-BC, FAANP, FAAN, Associate Dean of Academic Affairs

## MS Nursing

*The importance of continuing education has always been clear to me. The Master of Science in nursing education program was the perfect opportunity for me to further my education and develop my leadership abilities to best shape the future of health care.*

- Miranda Bandi, Student

## MS Clinical Research Management

*Working on a capstone project has not just taught me how to design and write clinical trials, but also how to budget, obtain IRB approval and produce my first 'white paper' suitable for publication into medical journals.*

- Michael Tompkins, Graduate

## MHI Healthcare Innovation

*We are living in a world of significant disruptions. Health care organizations need innovative leaders now more than ever to navigate changes in population, policy, finance and technology. The MHI students, alumni and faculty are made up of interdisciplinary health care professionals who strive to create innovative environments that foster new solutions to real health care problems.*

- Rick Hall, PhD, RDN, FAND, Director of Health Innovation programs

## BSN Postbaccalaureate Nursing

*In just one year, the postbac BSN program at ASU not only prepares you to start working as a professional nurse, but it also builds healthcare leaders. We conducted research, practiced in brand-new patient simulation labs and learned the essence of how to truly care for another person. I smile whenever I think about this program, and am finally so happy every time I go into work.*

- Brian Slayton, Graduate

- Advanced Nursing Practice (post-masters)
- Innovation Leadership (post-masters)

## Additional Programs

### Postbaccalaureate BSN

### Interprofessional Healthy Aging Certificate

 Downtown Campus  Hybrid  Online  Certificate Available

# Flexible Education for Working Professionals

Located in Arizona's capital, **ASU's Downtown Phoenix** campus provides a multitude of academic and professional connections for students preparing for careers across the health care spectrum including preventive care, research, policy and advocacy; in law, government and other public service; with nonprofit and public social service providers; and in arts and sciences, journalism, media and the corporate sector.

**Hybrid** courses are designed to promote active learning and increased student engagement. By blending classroom and online learning environments, instructors can select the best environment for each learning activity while affording the opportunity to address multiple learning styles. This format emphasizes active learning and problem solving while encouraging student ownership of their own learning.

Our **online** degree programs are effective, flexible and smart. Unlike a standard online lecture, ASU's online courses are highly interactive, engaging each student and ensuring the subject matter is fully understood. This structure also facilitates interaction with the highly recognized faculty on campus and classmates to encourage learning through collaboration, and provides access to the vast academic, research and career resources at ASU.
