Concurrent PhD/DNP	PhD, DNP	Fall	Downtown, Hybrid
Prelicensure Postbaccalaureate	BSN	Spring	Downtown
Emergency Nurse Practitioner	Certificate	Fall	Downtown, Hybrid

# Edson College of Nursing and Health Innovation

## Downtown

Located in Arizona's capital, **ASU's Downtown Phoenix** campus provides a multitude of academic and professional connections for students preparing for careers across the health care spectrum including preventive care, research, policy and advocacy; in law, government and other public service; with nonprofit and public social service providers; and in arts and sciences, journalism, media and the corporate sector.

## Hybrid

**Hybrid** courses are designed to promote active learning and increased student engagement. By blending classroom and online learning environments, instructors can select the best environment for each learning activity while affording the opportunity to address multiple learning styles. This format emphasizes active learning and problem solving while encouraging student ownership of their own learning.

## Online

Our **online** degree programs are effective, flexible and smart. Unlike a standard online lecture, ASU's online courses are highly interactive, engaging each student and ensuring the subject matter is fully understood. This structure also facilitates interaction with the highly recognized faculty on campus and classmates to encourage learning through collaboration, and provides access to the vast academic, research and career resources at ASU.

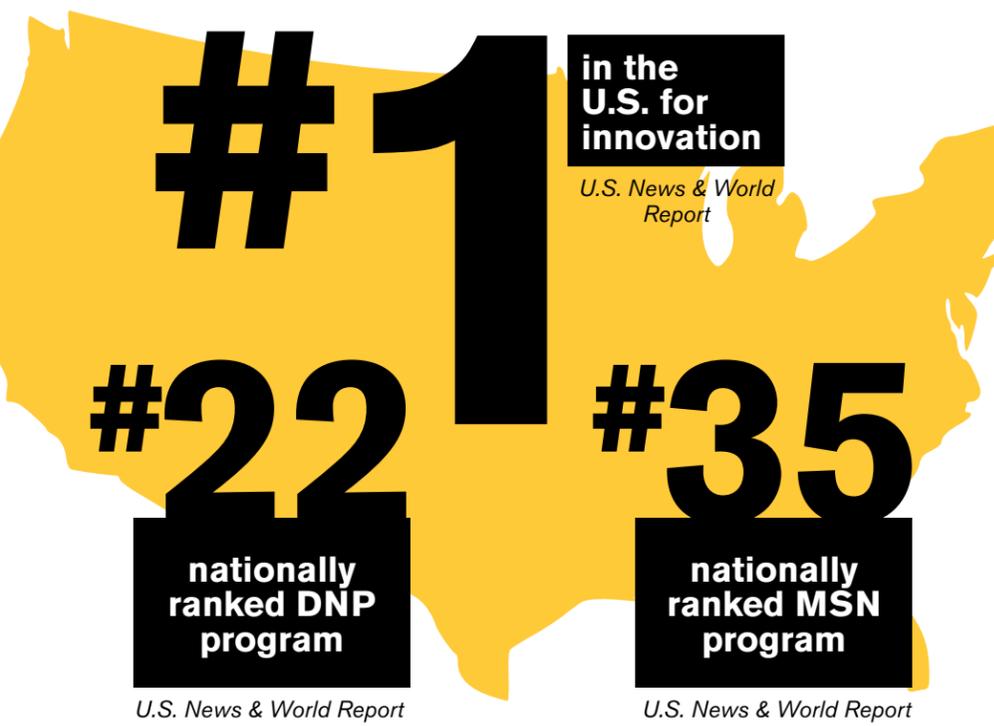

# WE ARE

**Edson College of Nursing and Health Innovation**, creating health care leaders and preparing nurses at every level to produce the best health outcomes possible, using evidence-based practice. Our cutting-edge research centers and top-notch faculty advance the

areas of cognitive development, dementia, family caregiving and public health. Diverse health and innovation degrees address complex challenges that take students beyond the hospital and out into the community. Health care is ripe for disruption, and no matter which degree they choose, every Edson College graduate is ready to rethink health care.

## Nationally Recognized

## 6 RESEARCH CENTERS

- ▶ Center for Advancing Interprofessional Practice, Education and Research
- ▶ Center for Health Promotion and Disease Prevention
- ▶ Center for Innovation in Healthy & Resilient Aging
- ▶ Center for Mindfulness, Compassion and Resilience
- ▶ Center for World Health
- ▶ PAHO/WHO Collaborating Centre to Advance the Policy on Research for Health

**Over 50** national awards for distinguished faculty

- ▶ American Academy of Nursing Living Legend
- ▶ American Academy of Nursing Fellows (FAAN)
- ▶ American Academy of Nurse Practitioners Fellows (FAANP)
- ▶ National Academies of Practice Fellows (FNAP)
- ▶ NLN Academy of Nursing Education Fellows (ANEF)
- ▶ Robert Wood Johnson Foundation Executive Nursing Fellows
- ▶ Western Academy of Nurses (WAN)
- ▶ American Journal of Nursing (AJN) Book of the Year

## Driven by Distinguished Faculty

### PhD Nursing and Healthcare Innovation

Our interdisciplinary PhD program provides both BS-PhD and MS-PhD students a research environment that fosters scholarship, critical thinking and creativity. Coursework is offered through a hybrid format designed to maintain the commitment to a highly mentored, interactive learning experience. Our PhD graduates conduct collaborative interdisciplinary research on the most critical challenges of our time. They are the next generation of leaders and scholars in the field, promoting discovery, generating knowledge with purpose and applying it to health outcomes.

- Bronwynne Evans, PhD, RN, FNGNA, ANEF, FAAN, Director of PhD Program

### MS Nursing

A master's in nursing will prepare you for a variety of nursing opportunities, from leadership positions to innovative roles in informatics, care coordination and patient safety. Our program will increase your skills for these new roles and help you to become an innovative and inspiring leader in health care.

- Maggie Morris, PhD, RN, Clinical Professor and MS in Nursing Coordinator

### MHI Healthcare Innovation

We are living in a world of significant disruptions. Health care organizations need innovative leaders now more than ever to navigate changes in population, policy, finance and technology. The MHI students, alumni and faculty are made up of interdisciplinary health care professionals who strive to create innovative environments that foster new solutions to real health care problems.

- Rick Hall, PhD, RDN, FAND, Senior Director of Health Innovation Programs

### DNP Doctor of Nursing Practice

The DNP program prepares advanced practice nurses and nurse leaders to effectively impact the health of individuals, populations and systems. Through application of evidence, the DNP prepared nurse creates innovative solutions to lead change in complex systems, impact health policy, and improve local, national and international health. Each DNP student works with an individual mentor to design, implement and evaluate an evidence-based project that focuses on improved health outcomes.

- Katherine Kenny, DNP, RN, ANP-BC, FAANP, FAAN, Associate Dean of Academic Affairs

### MS Clinical Research Management

The CRM program provides students with the knowledge needed to be successful in the research industry. Taking it a step further, the program utilizes applied learning, giving students the opportunity to apply their learning to common situations, tasks and experiences in conducting and managing clinical trials and research programs.

- JoAnn Pfeiffer, DrSC, RAC, CCRA, CRM Program Director

### MS Aging

Obtaining a MS in Aging is invaluable for anyone who works with older adults. It enables graduates to solve complex problems and develop innovative strategies to maintain the health, dignity and well-being of older adults as they age.

- Johannah Uriri-Glover PhD, MSCRN, RN, Clinical Professor and Coordinator of MS in Aging Program
